Dear Hiring Team at Aurora,

I am excited to apply for the **Software Engineer I** position at Aurora. The opportunity to contribute to cutting-edge autonomous vehicle technology aligns with my passion for building scalable, high-performance systems that solve real-world problems. Aurora's mission to make transportation safer and more reliable deeply resonates with me, and I am eager to bring my technical skills to your team.

With experience in **Go, Python, and cloud infrastructure**, I have developed backend services that prioritize reliability and efficiency. My background in **distributed systems, API development, and infrastructure as code** would allow me to contribute meaningfully to Aurora's software engineering efforts. Additionally, my experience working in **high-performance computing environments** has strengthened my ability to design robust and scalable solutions.

I would love the opportunity to contribute to Aurora's mission and grow alongside a team of talented engineers. Thank you for your time and consideration, I look forward to the possibility of discussing how my skills can support your team.

Best regards,

Jordan Conklin
